This time round, it was for the boda boda riders of Maragua town's turn to get safety riding tips!

This programme is sponsored by Car & General and is conducted by St. John Ambulance.

Riders were shown how to handle common injuries caused by road accidents.

The health and safety programme is part of Car & General's CSR programme that includes free eye care programme that is done in conjunction with Lions Club of Kenya and the national juakali mechanics training that endeavours to ensure Kenya has competent juakali mechanics to deal with the company's products on every street, every town.
